

Authority, Influence & Power

-the challenges of being a Lead Cancer Nurse

**Feedback from
Workshops**

Objectives

- To discuss strategies for motivating staff to incorporate research into their professional lives and use research to change practice
- To troubleshoot change management in practice
- To appreciate how to determine research priorities
- To understand the components of the research cycle, collaborative models, and how/where to apply for funding

Using these theories

- Bring nurses together who don't normally mix
- Good process of facilitation
- Vivid feedback
- Access to information

Prioritising Research

- What are the problems/issues?
- Gaining consensus
- EONS Priorities

Lead Cancer Nurses - Research

Pursue achievable goals

Collaborate and reap greater benefits

Collaborative Research

- Infrastructure
- Multiprofessional
- Way forward with today's research questions
